

Release Plan

DnD Assistant App v1
4/5/22 (revised 5/31/22)

High Level Goals:

- Creator Creation
- Spell Search
- Dice Roller
- Inventory Manager

User Stories:

Sprint 1:

1. As a player, I want to roll dice with a button, so that I don't need to have physical dice (3)
2. As a player, I want to log in and out of the website, so that I can have information associated with my personal account (5)

Sprint 2:

1. As a player, I want to select and modify my character's attributes on a website, so I don't have to do it by hand (9)
2. As a player, I want to see the information associated with each character option, so I can know what my choices mean for my character (6)
3. As a player, I want a walkthrough of the character creation process, so I can quickly introduce myself to playing DND on my own (4)

Sprint 3:

1. As a player, I want to save my character to my account, so I don't have to recreate it with every use (5)
2. As a player I want to be able to view a list of spells I can use on my website, so that I can use it as reference during my game (2)
3. As a player I want to be able to search and filter through my list of spells by attribute, so I can easily access the spells I'm looking for (5)
4. As a player I want to be able to bookmark my spells, so that I can quickly access my favorite/most used spells (4)

Sprint 4:

1. As a player, I want a display of my character's attributes, so that I can see all of my character's information at once (5)
2. As a player, I want to upload a file with my character's information so that I can view its contents and save it to my account (5)

Backlog:

1. As a user I want the app to look coherent, organized, and intuitive so that I know how to access my data (13)

2. As a player I want to be able to manage my character/party's inventory through the website, so I don't have to keep track of items and equipment by hand (7)
