

Sprint 4 Report
DnD Assistant App
DnD Assistant App Team
05/18/22 – 05/31/22

Actions to stop doing:

- Creating branches while working on the same component
- Pruning branches before everything has been merged
- Naming branches with words like 'final' or 'new', which can be confusing as things get updated/added to later

Actions to start doing:

- Create new branches based on new components being added
- Give branches longer, more descriptive names

Actions to keep doing:

- Showing up to meetings/stand-ups
- Having meeting topics/agenda
- Creating mockups of UI designs
- Pull requesting finished work

Work completed/not completed:

- Completed:
 - Functions for adding character's ability score
 - Character display page
 - Pushing character information into database
- Incomplete/backlogged:
 - As a player, I want a walkthrough of the process of creating a character, so that I don't have to google it
 - As a player, I want to create a character, so that I can play the game

Work completion rate:

- User stories completed: 2
- Estimated ideal work hours completed: 21
- Sprint days completed: 14
- Average: 0.14 user stories per day, 1.5 ideal work hours per day

Final burnup chart:
